

No complexity. Just crypto.

A European platform with MiCA license and local support.

crypto4me

The crypto4me vision

Crypto is no longer just about speculation. It has become an industry of its own – and investors who move with intention today will help set the tone for the next decade.

Crypto4me is building a complete crypto ecosystem for the European investor: a spot trading platform, recurring buys, trading bots, curated crypto bundles – all under one roof, with low fees.

Regulated where it matters. Authorised by the National Bank of Slovakia and fully MiCA-compliant across Europe — the gold standard for digital assets. And behind every decision? Real people. Named leaders. A visible team. Ambassadors who don't hide.

Four pillars. That's it. **Rules. Pricing. Products. People.** Nothing more. Nothing less.

A word from the founder

"Crypto4me was built on a clear idea: every European investor – whether buying their first Bitcoin or managing a large portfolio – deserves a fast, intuitive, and completely secure platform. We did not set out to build just another exchange. We built trust."

Miloš Mázor,

Chairman of the Board and CEO, Madison Six

Security First.

MiCA – Europe's gold standard:

For most platforms, regulation is a burden. For us, it is an advantage. crypto4me complies with MiCA – the most comprehensive crypto framework in the world. In practice, that means transparency, strict risk management, and safeguarding of client funds far beyond the usual standard.

DORA – operational resilience:

Cyber threats never sleep. Neither does our infrastructure. The system meets DORA requirements: corporate-level threat detection, bank-grade encryption, and two-factor authentication.

Institutional backing:

Crypto4me is operated by Madison Six j.s.a. – one of the first crypto service providers with official authorisation from the National Bank of Slovakia and a member of the Slovak Cryptocurrency Association. Behind every transaction is a real, regulated institution. Not an anonymous protocol.

At home across Europe

We started in Slovakia. Today, we are growing across Czechia, Germany, Poland, Greece, Croatia, Slovenia, and Hungary. Cross-border trading without unnecessary bureaucracy – the way Europe should have worked from the beginning.

Borderless liquidity

Trades are executed quickly, without losses caused by unnecessary cross-border fees.

Local account and fast SEPA payments

Send money conveniently to a Slovak bank account, not overseas. Instant SEPA payments mean no waiting for the bank, efficient payment processing, and quick settlement.

One platform, every market

Whether you invest from Warsaw, Berlin, or Athens, you get the same speed, the same reliability, and support in your own language. Everywhere.

Simple, fair, and local

- 1. Assets that make sense**
Bitcoin (BTC), Ethereum (ETH), Solana (SOL), Cardano (ADA), Ripple (XRP), USD Coin (USDC), and other leading cryptocurrencies. One interface, a European platform fully subject to MiCA regulation.
- 2. Ready in minutes**
From registration to your first trade, a smooth KYC/AML verification process and intuitive app guide you through every step. Without compromising security.
- 3. Low fees**
Fair rates. Fees start from 0.4%. You see the full price before every trade. No catches. No surprises.
- 4. A dedicated approach**
for every client, from the first login. No distinctions, no tiers at the door — every case is handled personally, with care at every step of your investing journey.
- 5. Local support**
Our support team is ready to solve any issue directly in your language.

Spot trading platform

The heart of crypto4me. A fully regulated environment for trading digital assets – reliable, transparent, and simple. Fast settlement, robust security, and 24/7 availability.

Intuitive interface, professional features:

Advanced tools, clear account management, and an environment built for beginners and professionals alike.

No rocket science.

Efficient trade execution:

Fast buying and selling of cryptocurrencies using limit and stop orders.

Security on every level:

Bank-grade encryption, two-factor authentication, and continuous monitoring. First-class operational and technological security – before, during, and after every trade.

For retail and professionals:

Your first trade or corporate treasury – the platform scales with you. One environment. One rulebook. In full compliance.

Recurring buy (DCA)

A regular monthly purchase based on your own budget. You set it up. crypto4me handles the rest. No emotions. No guessing the right moment. Just a disciplined strategy that runs automatically.

Choose your amount

Start with any amount from EUR 10, with no maximum limits.

Choose your crypto

One coin or a full mix. BTC, ETH, SOL, ADA, XRP, and other leading assets in one clear wallet.

Set your funding method

Choose how you want to pay. SEPA transfers make funding fast and secure.

We handle the rest

Your purchase happens automatically every month – exactly according to your setup. Dollar-cost averaging (DCA) in practice: removing emotion and building your portfolio step by step.

Crypto packages

Not sure where to start? You do not have to choose every asset yourself. Our sample bundles combine the most in-demand digital assets into one considered purchase. No analysis paralysis. No picking coins one by one. One click and you get a pre-selected mix. And when you want full control, you can always build your own bundle based on your preferences. Here are six strategies based on your investor profile:

Conservative foundation: Established assets with the longest track record on the market – a mix trusted even by major institutions.

Tokenized assets (RWA): Traditional finance connected to blockchain – real estate, bonds, and commodities in digital form.

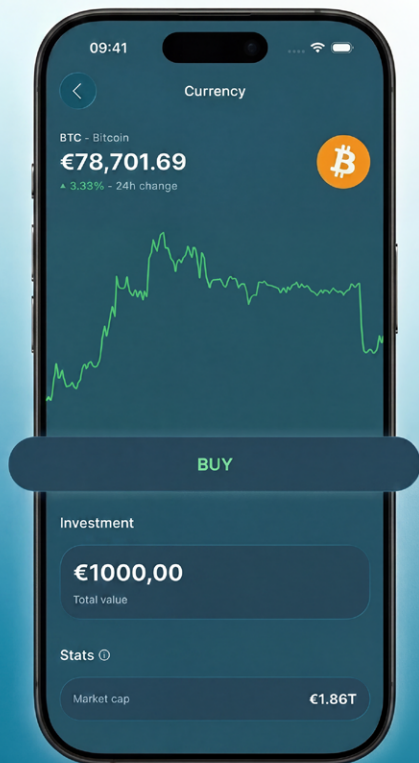

Artificial Intelligence: Infrastructure powering the revolution in artificial intelligence, machine learning, and computing power.

Decentralized finance (DeFi): Projects building a new financial layer – lending, exchanges, and yield protocols without intermediaries.

Multichain revolution: A bet on connected worlds – projects that can communicate across blockchain networks.

Web3 & meme culture: Gaming, the metaverse, meme coins – projects where community and internet culture play the leading role.

Crypto in your pocket

Fully compliant trading directly from your mobile phone.
Simple, but without compromising security.
Available for iOS and Android.

Trade in Seconds: BTC, ETH, SOL, and other leading assets.
Elegant, intuitive interface.

Institutional-grade security: Advanced encryption and DORA – with you wherever you go.

Transparent fees: You see the price before confirming.
Low market fees starting from 0.4%.

Real-time speed: SEPA made simple and fast. Your money moves when you need it to.

Smart diversification: Crypto bundles directly in your mobile app – a balanced portfolio in one tap.

Our ambassadors

Trust is not built only on licences and technology. It is built on people. That is why crypto4me joins forces with ambassadors who are authorities in their fields and share the same values: elite preparation, performance under pressure, and results beyond marketing promises.

Panathinaikos BC – a basketball dynasty from Athens

One of the most successful basketball clubs in the world – the legendary “Greens”. PAO holds a record 7 EuroLeague titles (1996, 2000, 2002, 2007, 2009, 2011, and 2024) – the most of any club in the modern era of European basketball. Add 40 Greek championship titles, and you get the definition of a dynasty.

Kasper crypto4me – elite UCI Continental cycling team

A professional cycling team competing at the highest European UCI level. Thousands of kilometres of preparation for seconds that decide the outcome. We take the same approach – thoughtful decisions and infrastructure built down to the smallest detail.

Norbert Nóvényi Jr. – professional MMA fighter

Hungarian professional MMA fighter known as “Magic”, formerly a standout Bellator prospect, now a Hexagone MMA star and athlete of the renowned London Shootfighters gym. The son of an Olympic champion – discipline runs in the family. Norbert proves his results in the cage and has fought his way to the top of European MMA through relentless hard work.

About us

The crypto market does not wait. A regulated, secure, and fair future for digital assets is here. crypto4me is your entry point. No complexity. Just crypto.

In a crypto world full of anonymous founders, crypto4me is led by a team with real names and years of experience in banking, cybersecurity, and European compliance. People who do not just understand crypto – but for whom implementing demanding European regulation and cybersecurity requirements is part of their everyday professional practice.
